	Division of Information Engineering (Master's Course)
Diploma Policy	The Master's Course in the Graduate School of Science and Technology confers a Master of Engineering degree to a student who has been enrolled in the Master's Course in Information Engineering for at least 2 years, developed the following qualities and abilities, earned the required minimum number of credits for completion of the Master's Course (30), and passed the prescribed review of a master's thesis. (1) The broad perspective and high-quality technical skills necessary to meet society's diverse demands for information engineering. (2) The ability to identify and solve problems across the spectrum of a highly sophisticated information society using one's specialized skills. (3) Abilities that can be utilized internationally.
Curriculum Policy	The educational curriculum of the Master's Course in Information Engineering is built around the following elements. (1) Developing human resources with advanced specialized knowledge and skills as well as a broad perspective in information engineering. (2) Nurturing the education, knowledge, and creativity for exhibiting specialized knowledge in the various fields of an advanced information society. (3) Fostering abilities that measure up to international standards.
Admission Policy	Students intending to enroll in the Master's Course in Information Engineering must have: (1) Basic academic abilities and knowledge at the university-graduate level and an interest in specialized fields of information engineering; and (2) The ability to tackle things tenaciously, demonstrating a thirst for inquiry, a desire to research, and a strong sense of determination.
